# LUCA

Disney+

# *By boat in the footsteps of cartoon* **LUCA**

«Luca», the Pixar film set in Liguria is pure poetry  
We loved this animated film about the friendship between a little girl and two sea monsters against the backdrop of a twentieth-century Italian summer even before the trailer in 2021.

it is a story of friendship, which recalls, this time between children, the encounter between universal worlds and emotions in the Oscar and Golden Lion winner “The Shape of Water”

It was born under the direction of an Italian, Enrico Casarosa, from Genoa, who set it in the Cinque Terre of the 1950s.

Everything is poetry within the reach of the little ones for the pleasure of even the older ones.

We are happy to be able to let you see the splendid scenery of this Pixar cartoon movie on board our boats for cruises suitable for adults, teenagers and children
